

Organic Garden in Taiwan FXM

bird's-eye view of our garden

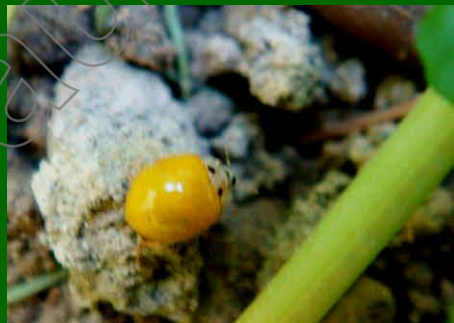

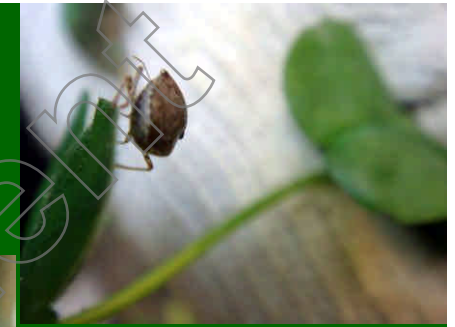

Compost area

New lives in our garden

Stinkbugs
some were not
hatched

From winter to summer

New experience
from compost

Add Dolomite power to change the soil quality in May---learned from Rocio

Routine work

Collect liquid fertilizer

Find insects
and love them

Design the new garden

Grow from seeds
and then
transplant

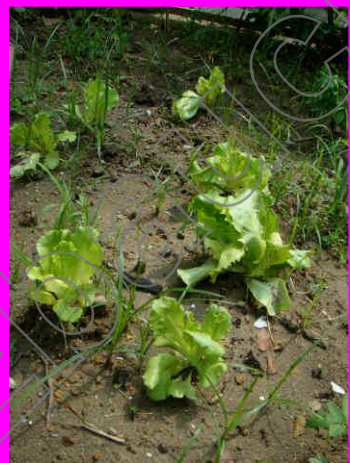

Control vs. Experimental

We started
new research

Green house
vs. outdoors

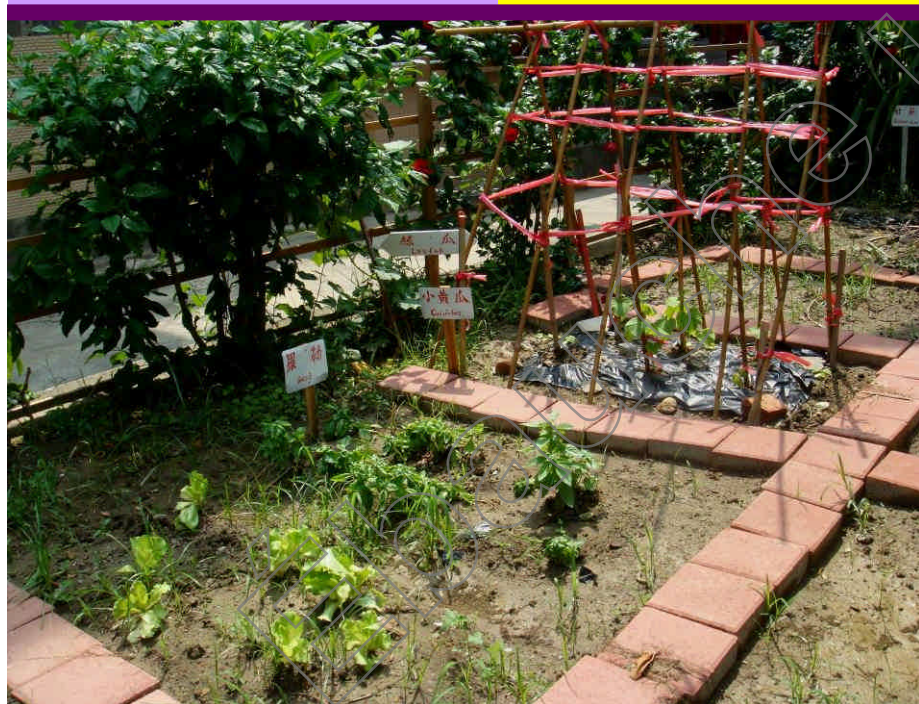

**Our pineapple has
no flowers, but Sam
still made a hat for it**

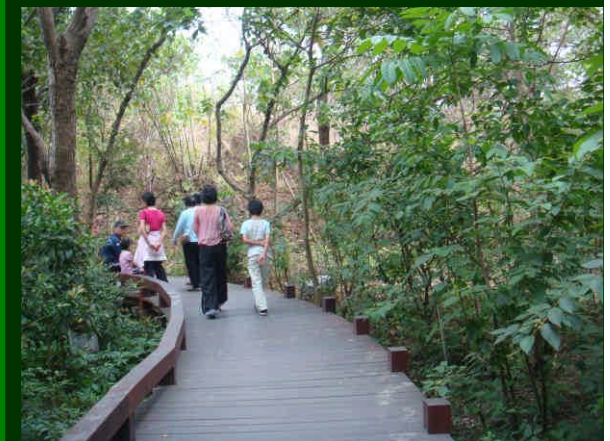

Pineapple hats

Our pineapple
skipped the
purple flowers
to the fruit directly

New garden

Wetland Report -- Taiwan FXM

Explored the wetland

A new paradise
in the city center

Looking for the insects

Live with nature

New

experience

Bird
watching
spot

Artificial pool for
biological balance

Wetland in the downtown

A place to keep biodiversity

**Teach the children how
to treasure the living beings**
